

15-50 hp

Rotary Screw Compressors

Performance That Pays

Welcome to Ingersoll Rand's UP-Series Rotary Air Solutions, a Higher Standard of Performance.

Boost Your Profitability

Boosting Your Company's Profits Was the Main Goal That Ingersoll Rand Had in Mind When Designing the Revolutionary UP-Series Line of Integrated Rotary Screw Air Solutions.

So how can a compressed air system help you increase profitability? The answer is really pretty simple: by ensuring that you achieve highest productivity in your shop while reducing the total costs of ownership to the absolute lowest levels.

The UP-Series is more than an integrated air system; it's a complete air solution designed to maximize the key drivers of profitability in today's business:

- Ultimate reliability
- Shop productivity
- Flexibility of operation
- Energy efficiency and savings

Exceptional Value

Ultimate Reliability

Maximum Uptime

Ingersoll Rand is so confident in the performance of the UP-Series, that we've extended the warranty to five years.

Fewer Connections

Smart integration eliminates leaks and pressure drops, maximizing reliability.

Ultimate Efficiency

More Air For Your Money

Industry-leading performance delivers more air for less horsepower, saving thousands of dollars per year on energy.

Smart, Energy-Efficient Controls

Eliminates wasteful unloaded running by unloading rapidly and by cycling the compressor on/off when not needed.

Ultimate Flexibility

Compact Footprint

Receiver mounting frees up valuable floor space and reduces installation costs.

Installation Close To Point-of-Use

Whisper-quiet operation allows for installation closer to point-of-use, reducing costs and ensuring a better, safer work environment.

Ultimate Productivity

Closely Maintained Pressure

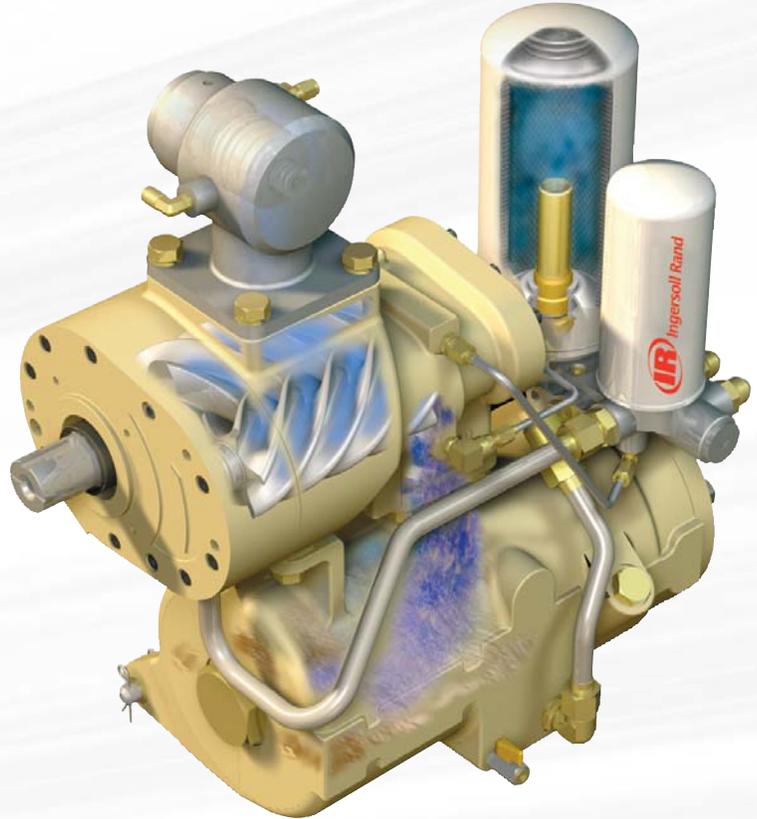

Reducing discharge pressure and avoiding excessive pressure bands, increases downstream tool and equipment life.

Innovation

High-Efficiency Integrated Compression Module

- To provide maximum performance, efficiency and ease of service, the airend, interconnecting piping and separation system have all been integrated into one simple design. Integration of the compression module eliminates leaks and pressure losses to increase efficiency and performance.
- Service and maintenance are made extremely simple through spin-on filtration and separator cartridges.

Real World Advantages

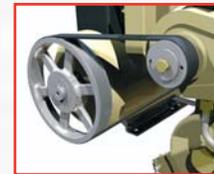

Whisper-Quiet Operation

Oversized, high-efficiency cooling air blower provides sound levels as low as 67 dBA.

Poly-V Belt Drive

Premium drive system applies patented automatic tensioning to eliminate belt stretch and increase air output.

Dual-Control Operation

Reliable and effective load/no-load control with automatic stop and restart facility for maximum flexibility.

Advanced Cooling

A package pre-filter, efficient combination aftercooler with access to both sides for easy cleaning and top discharge to simplify ducting.

Simple Diagnostics

Visual indication of operating status and hours run for ease of operation and reduced downtime.

Generous Serviceability

All key maintenance components have been grouped to provide ease of serviceability.

Integral Air Treatment for 15-30 hp

High-Efficiency Filter Pack

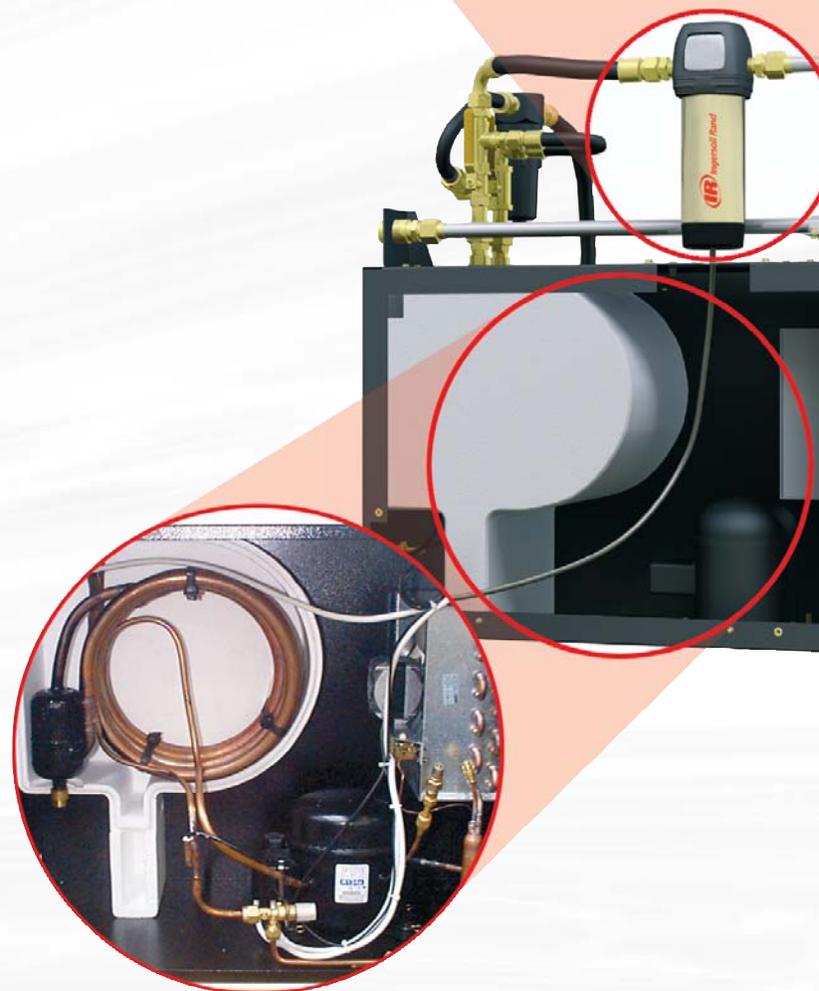

Clean Air to Drive Productivity

- Deep-bed general purpose filtration to deliver best performance, reduce pressure losses and extend operating life.
- Particulate removal to industry leading 1 micron.
- Longer element life, lower pressure drop
- Better air quality delivered to tools and equipment results in longer life.
- Prepares air for further treatment to meet specific requirements.

Energy-Saving Refrigerated Air Dryer

Dry Air to Drive Productivity

- High-efficiency direct expansion refrigerated dryer automatically starts with the compressor and operates continually. This operating cycle ensures immediate drying, reactive to the compressor loads. The dryer operates until the compressor unit is shut down.
- Simple coiled tube-in-tube heat exchanger is selected at this size of unit to achieve optimum performance, with low losses, high thermal efficiency and long service life.
- Highly efficient centrifugal moisture separator with timed solenoid drain valve permanently discharges condensate.
- Eliminates corrosion of piping – a cause of premature wear of tools and seals.

Smart Integration for 15-30 hp

Advanced Packaging to Drive Reliability and Uptime

- "Dry" air receiver mounted in a compact package lowers the cost of installation (optional floor mount also available).
- Integral air cooling with separate flow paths ensure cooling is achieved 100% of time the that compressor is running.
- Easy access to all compressor and air treatment components, promoting serviceability.
- Package pre-filter for longer component life and reduced maintenance cost.
- Simplified piping eliminates potential leaks.
- Single-point condensate drain system instead of separate points reduces installation cost.
- Segregated cooling compartment provides advanced cooling flow management and reduces noise level.

Practical Options and Kits

Customize Your System

- Floor mounted
- Compressor package without air treatment equipment
- Weather-resistant enclosure
- NEMA 4 package with TEFC motor
- PORO (power outage restart option) to safely restore machine following power interruption
- Frost protection (not available for units with refrigerant dryer)
- Upper range modulation control
- Sequence controllers
- Pace system pressure regulators

Integral Air Treatment for 40 and 50 hp

Modular Cross Flow Heat Exchanger

Leading Technology Driving Efficiency

At the heart of the dryer lies the specially designed cross flow heat exchanger module, incorporating air-to-air and air-to-refrigerant heat exchangers; and a high-efficiency stainless steel de-mister condensate separator all in one compact unit.

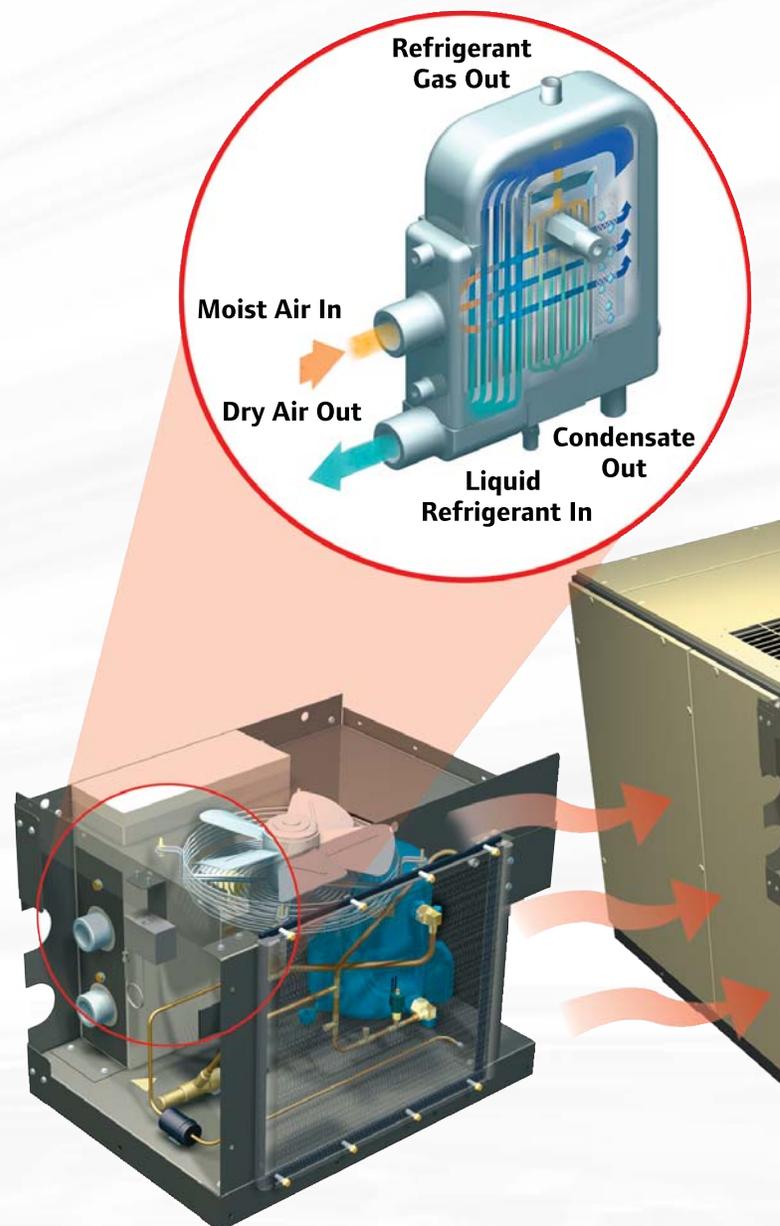

Pre-cooling reduces the refrigeration load by as much as 60%. Air is further cooled through refrigerant heat exchange. Moisture is removed by the de-mister, close-coupled to the evaporator.

Cross flow heat exchanger incurs minimum air pressure losses while ensuring efficient water removal.

Energy-Saving Refrigerated Air Dryer

Dry Air to Drive Productivity

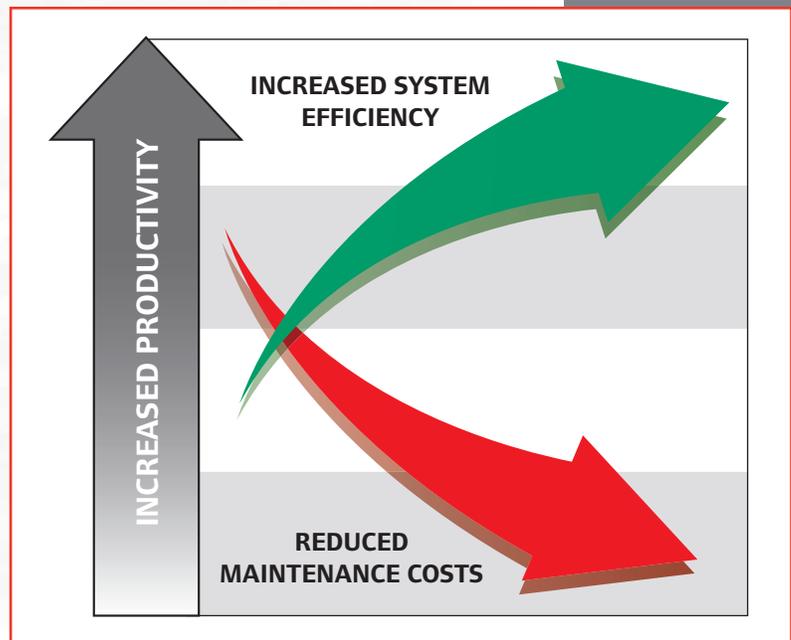

- Direct expansion – refrigeration dryer simply and reliably dries the compressed air whenever the machine is loaded.
- Composite welded aluminium heat exchanger for low losses, high thermal efficiency and long service life.
- Solenoid drain valve and high-efficiency moisture separator to permanently discharge condensate.
- Eliminates corrosion of piping – a cause of premature wear of tools and seals.

Smart Integration for 40 and 50 hp

Advanced Packaging to Drive Reliability and Uptime

- Floor mounted units only (a wide range of free-standing receivers are optionally available).
- Integrally cooled dryer module with separate cooling paths to achieve best overall efficiency and ensure cooling is achieved 100% of the time that compressor is running.
- Spacious design simplifys access and promotes serviceability.
- Package pre-filter for longer cooler life and reduced maintenance costs
- Simplified piping eliminates potential leaks.
- Single-point condensate drain system.
- Optional supply without dryer installation.

Unsurpassed Local Customer Support

Long-Term Value

There is more to value than simply price. The commitment of many thousands of dedicated compressed air specialists, either directly employed or members of a select market channel partnership, mean that friendly Ingersoll Rand support is close at hand. In addition to parts availability, qualified on-site service is available globally.

Aircare Advantage

Leading Warranty as Standard

The Ingersoll Rand UP-Series compressor comes with a 1-year inclusive warranty package with optional 5- and 7-year warranty coverages. Consult your local service provider for details.

There are options available to extend the warranty coverage and get total peace of mind with Aircare Advantage.

Intellisys Control Option

Probably the best known name in compressor control systems, the optional Intellisys Control offers precise pressure control, energy saving functions and advanced asset protection.

Ease of Service

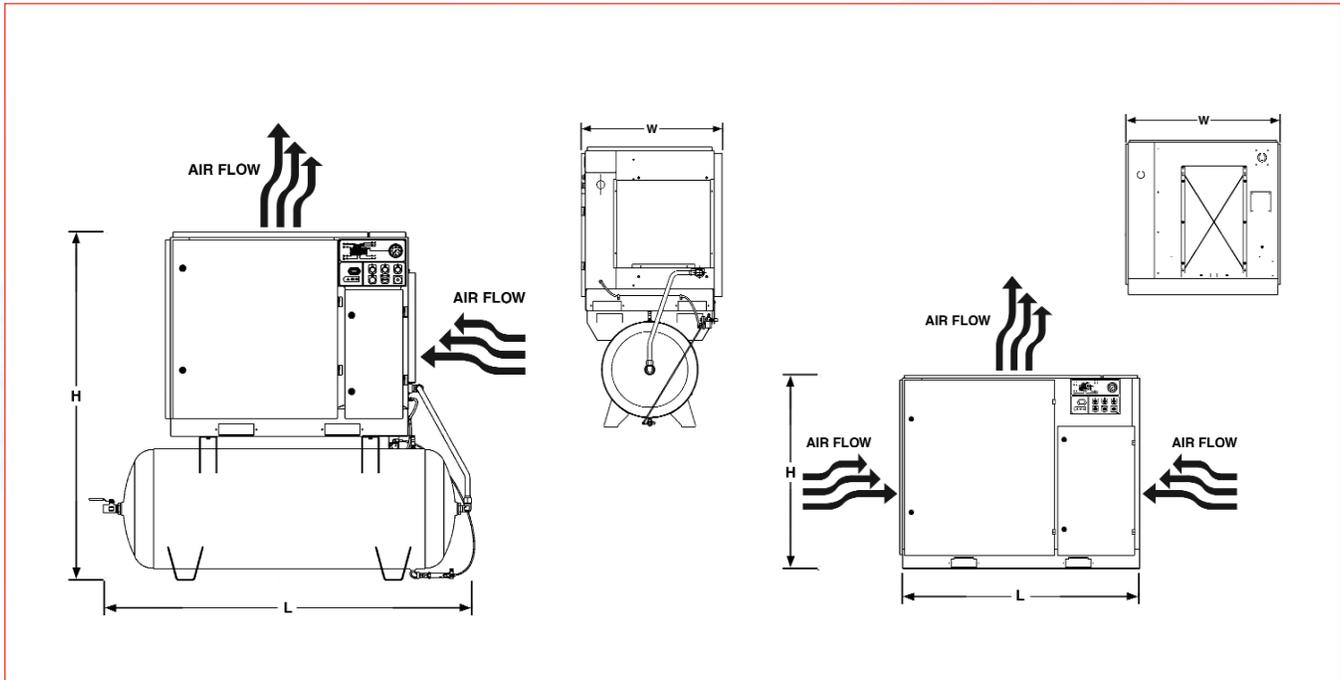

Ingersoll Rand designed the UP-Series package with ease of service in mind. Spin-on filter and separator element along with 3,000/6,000/9,000 hour annual service intervals make life simple. Your Ingersoll Rand Air Solutions provider will recommend the most cost-effective maintenance program to keep your investment operating trouble-free for years.

Ultra Plus Coolant

Save cost with the advanced synthetic compressor coolant supplied as standard. Ultra Plus coolant reduces friction and wear, has a long operating life, has simple condensate separation characteristics and is biodegradable.

The best overall value is getting the most out of your investment. Ingersoll Rand customer support teams will help you protect your investment.
